Camping gear storage for small spaces

PRINT • CHECK • REVIEW

https://readyresourceful.com/diy/camping-gear-storage-small-spaces/

Prepared: 7 October 2026

Organize equipment around the trips you actually take, keep related components together, and separate ready equipment from items needing care or repair. Measure available storage and follow each manufacturer's care instructions before choosing containers.

ACTION CHECKLIST

- [ ] Choose the next type of trip to plan for.
- [ ] Group the relevant equipment by function.
- [ ] Identify damaged or incomplete items.
- [ ] Read actual care and storage instructions.
- [ ] Measure openings, containers and handling space.
- [ ] Label ready, needs care and needs repair states.
- [ ] Create a location record.
- [ ] Rehearse packing from the record.

This is a planning aid, not a complete emergency plan or professional training. Follow local instructions and equipment manuals.

REFERENCES

Additional checks:

- [ ] Check tent and sleeping-bag storage instructions separately.
- [ ] Record borrowed equipment as unavailable.
- [ ] Resolve care and repair tasks before changing readiness status.
