Emergency water storage in a small apartment

PRINT • CHECK • REVIEW

https://readyresourceful.com/preparedness/emergency-water-storage-small-apartment/

Prepared: 7 October 2026

Choose manageable containers and suitable storage locations before purchasing a water reserve. Use the CDC baseline stated below, allow for additional household needs, and keep a dated record of the water actually available.

ACTION CHECKLIST

- [ ] Identify household members and additional needs.
- [ ] Read the CDC baseline and container guidance.
- [ ] Measure candidate storage locations.
- [ ] Choose containers the intended user can handle.
- [ ] Record quantity, location and dates.
- [ ] Set a separate calendar reminder.
- [ ] Update the record after using or replacing water.

This is a planning aid, not a complete emergency plan or professional training. Follow local instructions and equipment manuals.

Additional checks:

- [ ] Calculate the household starting quantity using the cited CDC baseline.
- [ ] Record filled water currently available.
- [ ] Record applicable filled/package and review dates separately.
